

Executive Summary

SO2D-L.L.C. (Stop Opioid Overdose Deaths) Service-Disabled Veteran-Owned Small Business (SDVOSB)

Mission & Leadership

SO2D-L.L.C. is dedicated to combating the opioid overdose crisis through real-world, technology-driven solutions. Founded by **Wilbur Jones**, a U.S. Navy veteran and certified Adult Health Nurse Practitioner, SO2D combines lived experience, clinical insight, and public health leadership to drive lasting change in substance use disorder (SUD) prevention and recovery.

Flagship Innovation: GuardianLink™

GuardianLink™ is SO2D's leading-edge intervention system. It uses wearable pulse oximetry sensors to detect overdose symptoms in real time and instantly alerts pre-identified caregivers and community responders—**anywhere, anytime**. This mobile-based system supports Medicaid and VA-aligned harm reduction efforts for high-risk groups including:

- Formerly incarcerated individuals
- Veterans in recovery
- Adolescents at risk

Public Health Impact & Experience

SO2D brings over a decade of frontline experience across:

- ER, ICU, and correctional healthcare
- Medication-Assisted Treatment (MAT)
- Community-based pilot programs for vulnerable populations

Our founder helped lead state-level health initiatives in partnership with the **University of South Florida** and **Florida's Department of Public Health**, including a pilot osteoporosis screening program still in use today.

Federal Readiness & Contracting Goals

SO2D is actively pursuing pilot implementation and reimbursement projects through:

- **MACPAC**
- **VA Pathfinder Program**
- **SAM.gov IDIQ contracts**

With a 3.8 GPA in both undergraduate and graduate studies, our founder offers academic rigor to match real-world expertise. We are fully registered in **SAM** (UEI: SZAMYD6VA7J7 | CAGE Code: 02U90).

Expanded Technical & Analytical Capabilities

We offer a strong foundation in data science and digital health, including:

- **CompTIA Healthcare IT (HIT) Certification** – Mastery of EHR structure, interoperability, and HIPAA compliance
- **Johns Hopkins University Certificate in Healthcare Data Analysis** – Focus on population health, clinical data systems, and learning health environments
- **University of Michigan Certificate in Public Sector Data Analytics** – Skills in **R programming**, visualization, and statistical modeling for health policy

These tools allow SO2D to support Medicaid and CHIP innovation with evidence-based analysis and measurable impact.
